

20" CH-R wheels for Camaro

There is a lot more to the BBS CH-R wheel than just good looks. With a flow-formed rim area and backmilled spokes, these BBS technologies deliver a true performance wheel with an excellent "Stiffness to Weight Ratio". The aggressive styling is taken directly from our Motorsports Department. Another unique feature is the replaceable stainless steel rim protector.

BBS CH-R Benefits / Technical Advantages

- The BBS CH-R Cast / Flow-formed technology is over 50% stiffer than the OEM wheel
 - Providing a more positive steering response and quicker turn in
- The BBS CH-R wheels are 1" wider on the front and 1.5" wider on the rear than OEM
 - Allowing the tire sidewalls to respond quicker and build less heat
- The BBS CH-R wheels are 12.2 lbs lighter per set than the 20" OEM wheels
 - Reduction of unsprung weight and has less rotating mass

	OEM 20" Wheels	BBS Aftermarket Wheels
	SS/ LT-RS	BBS CH-R
Wheel size / material:	20 x 8" / Cast Alu (front) 20 x 9" / Cast Alu (rear)	20 x 9" / Cast Alu w/Flow-formed rim (front) 20 x 10.5" / Cast Alu w/Flow-formed rim (rear)
Offset:	35mm (front) 40mm (rear)	29mm (front) 35mm (rear)
Wheel weight:	Front 30.3 Lbs each	Front 27.2 Lbs each (3.1 lbs per wheel lighter and 1" wider than OEM SS Front wheel)
	Rear 32.0 Lbs each	Rear 29.0 Lbs each (3.0 lbs per wheel lighter and 1.5" wider than OEM SS Rear wheel)
